ELMER LEROY CRUM INSTANTLY KILLED IN CAR ACCIDENT

While returning from a trip to Calgary Friday evening a car driven by E. L. Crum, who at the time was blinded by the lights of an oncoming car, left the highway and rolled over several times and came to rest in the ditch. The passenger, Roy Goss, was instantly killed. Mr. Crum, who had just turned 21, was the only survivor of the car because other than the car took the ditch and the car rolled over the day was crushed and torn from the body of the car. Mr. Crum was thrown out and landed inside the fence enclosure along the highway about fifteen feet from where the car came to rest. Hugh escaped serious injury suffering minor bruises. The accident was investigated by Corp. H. C. Cook, W.A.P., the RCMP, and Coroner Farnham.

Saturday evening at 7:30 an inquest was called by Coronor Farnham and after the jury viewed the remains adjourned indefinitely. On the jury were Mr. A. J. McLean, Mr. T. H. Booth, R. Wilson, E. J. Fougatt and A. W. Gilbert.

Elmer Leroy Crum was born in Frederick, Maryland, and was 83 years of age. He came to Gleichen, Alberta, in 1919 and has since been moving to Calgary where he resides for several years. With his family he came to Gleichen in 1918 and operated a farm owned by Dr. Farquharson until 1921. After living for several years around another farm about three miles from town he farmed for some twenty years. Lately he had been living on a farm near the Highwood River, a couple of miles northwest of town, known as the Skene farm.

His wife predeceased him in March 1943. Mr. Crum is survived by two daughters Mrs. Clara Williams, Victoria, and Mrs. and Miss of Calgary; three sons, Edward, Vancouver, Arthur, Calgary and Elmer of Gleichen. All of whom were present at the funeral except Mrs. Williams who is reported to be ill.

The funeral service Tuesday afternoon at 2:30 from United Church with Rev. S. R. Hunt, officiating. Interment was made in the family plot of the local cemetery.

The following old friends were pallbearers: Messrs. D. McLean, W. Cook, T. Krause, W. Ferguson, J. Hutchison and R. Nole.

SCHOOL NOTES

BY PAULINE SUTERMEISTER

War Savings Stamps are still essential to our war effort. Gleichen pupils are surely contributing—those not in whole heartedly could be hoped.

Contributions since school started are:

Miss Smith's grades 1-2 \$10.23
Miss Lehman's grades 3, 4, 5 \$6.46
Mr. Gilbert's grades 6, 7, 8 22.72
Entire H. S. grades 9, 10, 11, 12 22.25

Total invested \$82.67

To induce competition may I say, as you proceed, as the stamp is bought. We hope the parents encourage the children to lend more of their money. Remember War Savings Stamps are good Christmas gifts.

TROOPS FOR RECONSTRUCTION

Bomber-fighter formations for the air, landing boats and paratroops for the invasion, tank crews for the breakthrough. Men of vision see the need to retrain our fighting forces. Some people said it would be necessary. They were wrong. Our thoroughly trained and well equipped troops have answered the need of the hour.

Now another hour soon may strike. Canada will need many more men fit for battle to come back to industry stepped up to win the peace, a people alert and united. Men of vision see the need to train fresh troops for the work this is to be done of reconstruction. And there are those who think this won't be necessary—that ordinary men equipped only with an engineer's transit or a road machine can win the peace.

But the greater need is in reconstruction of man's spirit. The new situation after the war will require a new sense of purpose. Laissez faire and apathy can't carry our people forward. We need a strong force of men who know how to rebuild human character, men morally tough themselves, men ordinary man.

NOTICE OF FARMERS AGRICULTURAL MEETING

There have been considerable losses among horses caused in the ditch. A request has been made to the Provincial Veterinarian to address a meeting of producers on animal diseases, their cause, control and care.

We are able to announce that Dr. P. R. Talbot, provincial veterinarian for the Province of Alberta will address a meeting of producers on animal diseases, their cause, control and care.

Dr. Talbot will speak on the Post

B. J. Whitbread, District Agricultural, Old Courthouse, Calgary, will speak on the Provincial Forage Crop Policy and a more profitable use of forage crops.

There will be an open discussion period in which opportunity will be given for questions. Everyone welcome.

TOWN AND DISTRICT

Mr. Jack Webb underwent an operation Monday at the Bassano hospital.

Mr. and Mrs. Robt. Hill of Arrowwood have gone to Victoria to visit their parents Mr. and Mrs. W. Hill who have been living in the coast city for some time.

Cpl. Jack Wells, D.P.C., returned last Saturday morning after spending several years overseas and having completed his tour of operations. His wife was anxious to see his parents who moved to the coast some years ago.

Mr. and Mrs. J. A. Menard received word last week that their son Leslie who has been with the R.C.A.F. since June has been promoted to the rank of Pilot Officer. Leslie's many Gleichen friends are highly pleased to hear of his promotion and wish him every success. He is expected home next month.

Mr. and Mrs. J. A. Menard

received word last week that their son Leslie

has been promoted to the rank of Pilot Officer. Leslie's many Gleichen friends are highly pleased to hear of his promotion and wish him every success. He is expected home next month.

Present system of rationing new farm machinery and equipment, ensuring delivery to most needy farmers will be continued. The program is designed by agricultural authorities and advisors to meet the needs of agriculture.

Statistics for 1945 will be 102 percent of 1940, supply will not meet calculated demand and farmers are advised to obtain purchase permits from the Bureau before purchase of old equipment. Even with an end of the war in Europe, it will be at least a year before supplies, sufficient to meet all demands, reach the market.

For the first time in Alberta's oil history, lubricating oil is now procurable in the province from two different sources—from Princess, seventy miles west of Gleichen, the plant being located on the Bow River, twelve miles, thirty miles west of Rocky Mountain House. Both discoveries have been made in the Devonian limestone—Princess at 3,930 feet in the No. 2 well, and Bow River at 3,910 feet in the No. 2 well. The Bow River oil is reported to be 100° API, natural gasoline 30 percent and residue of 65 percent containing lubricant and distillate stock. Filling oil leases resulting from these discoveries are now active and increased development in these two areas is expected.

ST. ANDREW'S CHURCH

November 24th.
Evenings 7:30 p.m.

Rev. D. A. Ford, B. A., Incumbent

Trained and ready to fly to the nation's danger spots—a fight that will last the million.

They will be men who have no parents or parents to grind and who are against the beckoning of selfish and sectional interest. They will raise a standard to which the wise and honest can repair. They will rally the nation behind them in the fight to serve.

These trained troops for reconstruction are essential to Canada. With such a force the sacrifices of the nation will not be in vain. They can make effective the deepest feelings of both the statesman and the ordinary man.

GLEICHEN PHARMACY HAS PURCHASED REXAL DRUG STORE

Saturday a deal was closed where Dr. G. H. Farquharson, owner of the Gleichen Pharmacy, bought the Rexal Drug Store stock and residence owned by A. R. Yates who is retiring.

At the present time the stock is being moved from the Rexal Store to the Gleichen Pharmacy, which is just across the street, and from now on Gleichen will be served by one drug store.

N. F. Bell, District Agriculturalist, District Agriculturalist, spoke on the Post

Market for the town of Gleichen in 1943 from Wilmer, B. C., in East Kootenay where he had operated a drug store for several years. He opened the store in 1937 and sold it in 1943.

Mr. Yates came to Gleichen in 1943 to the Congreve Block, located where McKays Hardware now stands. The drug store was right on the corner and the rest of the ground floor was occupied by Congreve's Garage.

For several years he operated the drug store but as the district settled up the drug business increased to such an extent that he gave up the garage and moved to the drug store.

Mr. Yates has not been enjoying the best health for sometime and a couple of weeks ago underwent an operation in an Edmonton hospital in the hopes that this would bring him back to normal health again. Gleichen has another old time business man.

Mr. Farquharson is an old timer having been here for over 35 years and for more than 30 years has operated the Gleichen Pharmacy having made the Gleichen Pharmacy a success. The combination of the stock of the two stores will be an excellent position to attend to the wants of the public.

**A COUNTRY EDITOR
SEES OTTAWA**

(By Franklin B. Johnson)

In view of its importance in post-war planning on a national scale and the health of Canadians generally, a top seat—more or less—is required in this country to oversee and act on trends in Canadian vital statistics from a recent publication of the Warlimont Information Board. While substantial improvement is evidenced in Canadian health, the rate of mortality and particularly infant mortality is still high, and despite the remarkable achievements of medical science, especially in the field of public health services and through educational programs so that needless deaths and preventable diseases are being reduced.

The article is introduced by statistics showing that fewer Canadian mothers die in childbirth; that the number of infant deaths has been reduced by one-half; that the death rate of school children show that children seven to 18 years of age are one to two inches taller than they were 20 years ago. To dispel any complacency, however, it is pointed out that the director of public health services for the Department of National Health and Welfare, is quoted as saying that the general death rate is still too high and that much remains to be done through public health services and educational programs so that needless deaths and preventable diseases are being reduced.

The article is introduced by statistics showing that fewer Canadian mothers die in childbirth; that the number of infant deaths has been reduced by one-half; that the death rate of school children show that children seven to 18 years of age are one to two inches taller than they were 20 years ago. To dispel any complacency, however, it is pointed out that the director of public health services for the Department of National Health and Welfare, is quoted as saying that the general death rate is still too high and that much remains to be done through public health services and educational programs so that needless deaths and preventable diseases are being reduced.

By delving into the trend of statistics, the article picks out some interesting points related to marriages, births and deaths. The marriage rate shows a slight decline in prosperity levels and employment opportunities. It reached a low ebb during the depression period and showed a marked increase during the war years with marriages taking place in an earlier age. The 1930-32 average age of marriage for girls was 22.3 years; in 1940-42 it was 23.8. The peak of marriages was apparently reached in 1940-42 when the rate had declined and is now about what is considered normal. However it will probably decline further if the war is prolonged because of the absence of men. Mortality figures for 1939-40 indicated that a woman 15 years old, 82 would live to be married at least once. This was a low rate that reflected post-

P. O. FRANK MICHAEL RECEIVES D.F.C. MEDAL OVERSEAS

P. O. Frank Michael is a Flight Officer in the R.C.A.F. has been awarded the Distinguished Flying Medal.

O. M. Michael is the son of Mr. and Mrs. Michael of Gleichen, and is 24 years old. He born and raised in Gleichen. He is two and a half years since he went overseas and has completed his tour of operations. Frank has married an English girl and both are expected home as soon as they can get transportation.

ponement of marriages during depression years, and the fact that the birth rate shows probable marriage of girls 15 years old, which is abnormally high and not likely to continue for any length of time.

While the long term Canadian statistic is toward smaller families, the statistic point out that the rate follows very soon after first birth and many by a later second birth. The birth rate closely follows fluctuations in the marriage rate at an interval of about a year. This indicates a steady downward trend in the birth rate, but no marked increase occurred until 1940. It continued to rise through 1943 but with probably decreasing rate due to the downward trend in the marriage rate which began a year earlier. Studies show women marrying young have larger families than those marrying at an older age, but this is not true in Gleichen.

Presently the net effect of the downward trend in the birth rate, but no marked increase occurred until 1940. It continued to rise through 1943 but with probably decreasing rate due to the downward trend in the birth rate which began a year earlier. Studies show women marrying young have larger families than those marrying at an older age, but this is not true in Gleichen.

During the last few years of note in this country before the war was the maternal mortality rate was reduced 25 percent in the first three years of the war. The war further 30 percent reduction was noted. This improvement is based on thorough and increased number of births among a highly mobile population, a severe strain on hospitals and medical facilities.

The use of sulpha drugs and improved nutrition of the mother are two basic reasons for this good trend, improved nutrition of the mother is suggested.

the fight against V.D. is a family affair...

A laughing couple, dodging showers of rain, beside a garden...

These are scenes we know like, because they're part of our lives... because they'll happen... contentment.

But we know that these things don't last happy ever after. They're bound to be protected, too, because of ever-present dangers which may spoil them.

Veneral Disease is a killer. In a cold, relapsing disease it will grip and rob the home of its breadwinner, cripple, destroy. These are not mere possibilities. THEY HAPPEN HERE IN CANADA!

But these things should never happen. They can be prevented.

Young men and women can safeguard their future happiness together by making sure before marriage that V.D. will not blight their plans. A simple test, an inexpensive test, blood test for syphilis, is a protection no couple can afford to pass up.

FIGHT V.D. ON THE FRONT LINE

For all the facts about V.D. write your Provincial Department of Health for the "VICTORY OVER DISEASE".

The expectant mother, too, may face a hard time if she will be the victim of Syphilis in the expectant mother rarely shows outward signs, and it is no respecter of persons. A early sign of the disease, indeed a blood test, is a most essential, yet simple, first step in protecting her baby's health.

Now must the breakthrough come. In part, the answer lies in the home. The ability to work regularly and efficiently. Unprotected syphilis, striking in middle life, may affect the head of the household, to the neglect of the home, the wife, the children, the home itself. KNOW FOR SURE in time. Industrial medical examinations should include a routine confidential blood test.

A blood test should not be looked upon as something unusual. It should be regarded for what it is... a normal safeguard of health, security and happiness.

Invest a few minutes of your time in ASSURANCE.

Post-War Trade

THERE IS CONSIDERABLE INTEREST at present in the prospects for post-war trade and for the future demand for the products of Canadian farms and industries. It is evident that other nations are also concerned over the same problem. The time of peace is over, and there have recently been reports in the press concerning plans for expanding merchant fleets and developing trade relationships. In recent discussions on future world security, considerable attention has been given to the subject of international trade relations, and it has been clearly shown that in this, as in many other problems, there will have to be a new approach if we are to avoid repeating the mistakes of the past.

Much Exported From Canada

Canada's present position in regard to export trade is extremely favourable, in fact the volume of exports from this country has never been as great as it is now. Figures show that Canada exports are at this time more than twice as much each year as they have ever been in the past. We are reminded, however, that this prosperity is due largely to the war, and that eighty per cent. of our present export trade is made up of materials of war. Farm products, including butter, eggs, cheese, flour, meat, and grain, now meet demand on the British markets, but in the normal conditions which are to follow the war, we shall no longer buy these products much nearer home. Food shortages in many lands have also created a need for wheat and other Canadian grain crops, which may not continue long after the war is ended.

Research Aid To Prosperity

It is apparent that if Canada is to maintain the present level of export trade, efforts will have to be made to hold as many markets as possible and to find new ones. One way in which to retain markets for agricultural products lies in continuously improving the quality of the goods while at the same time the object of building a marked preference for them abroad. New markets can be obtained, in part, by finding new uses for our products. This involves research, and there is no question as to the seriousness in Canada of the need for greater emphasis on this important factor in national development. A recent announcement by the Minister of Trade and Commerce concerning the establishment of a new laboratory in Western Canada for work on the wider utilization of farm products is an indication of the trend in that direction, and it is to be hoped that further impetus may be given along these lines, in the interests of post-war prosperity.

Safety Glass

Now Being Used in Planes For Windshields

Powered by safety glass in automobile windshields, glass has taken to the air.

Laminated glass is used in planes for windshields, enclosures in cabin, gunnery ports, and gunner's noses. The glass consists of two pieces of plate glass with a sheet of plastic in between to prevent shattering.

The latest installation methods have given flexibility and strength to make the glass almost a transparent coat according to scientists.

JUNGLE FARE

Military surgeons meeting in New York last week got a taste of life in the jungle. They were invited to dinner offered them by representatives of the Army Air Force School of Applied Tactics. Among the sixty delicacies were rattlesnake steak, filet of shark, bacon wrapped in caterpillar, cattail roots, wild coffee and palm cabbage. Said, "At last report all diners had survived." —New York Times.

MYSTERY OF THE DAY

Budor Diesel, inventor of the now famous Diesel engine, did not live to see the full exploitation of his invention. One night in 1913 he strangely vanished from a small steamer while crossing the English Channel and the mystery of his death is unsolved to this day.

ALL STAY TRAVELLING

The stars of the world-famous "Traveling Circus", were last seen on the horizon of Jerusalem about the time of the Crucifixion, but due to the quiescence, they are no longer visible from Europe.

China's population has been estimated at 474,787,000.

BERING STRAIT TUNNEL

It was reported from the Battle-front that a German general complained bitterly because he was forced to sleep under a roof of snow and ice. All he could offer him was a coat of mittens.

To keep warm, he was told, the German general would have to sleep in a hole in the ground.

What an offer of a coat of mittens! What an offer of a coat of mittens!

A man who was probably hurtling around for years by a mentally unbalanced corporal!

To cope with a problem, a special committee was appointed by the U.N.R.A.

It is expected that Canadian manufacturers and workers who produce medical equipment and pharmaceutical supplies will be contributing largely to this program.

The plan is to have all the atmospheric conditions of a warm Spring day cut off.

The tunnel system will seek to produce all the atmospheric conditions of a warm Spring day cut off.

The dimensions of the new chamber will be the same as that of the old.

The committee will encourage the old chamber to be maintained.

It is to have better acoustics, more acoustics — except for the members of Parliament — and better ventilation.

The heating system will seek to produce all the atmospheric conditions of a warm Spring day cut off.

The dimensions of the new chamber will be the same as that of the old.

C.P.R. Car Has First Automatic Door, Wider Windows

IN MODERN MANNER: Rebuilt as part of the Canadian Pacific Railway's program for immediate improvement and refinement of existing cars and modern changes in new rolling stock to be built when peace comes, the sleeping car "Valdora" has many new features, with special consideration given to the comfort of the children. The first automatic door opener in a Canadian railway car at left has a pneumatic actuator which opens the door from the rear of the door, to do the work at the first touch of the luggage-laden passenger's hand. Top right is one of the large windows in the car, one large window of the observation car type installed in each section to give an unbroken view of the countryside and replace two smaller windows

which served before. Bottom right is the powder room of this model for modernization, where individual heads are provided which can be passed through the whole car, and a powder table and hanging shelf in black plastic. Other departures include the use of rubberized steel instead of wood attachments on the trucks as aids to smoother riding and undisturbed illumination, car lighting and unobtrusive illustrations, car seats, etc., to prevent confusion on dimly lighted station platforms and an interior finish which employs metal trim and pastel paint and upholstery in a variety of colors. The "Valdora," now in service, also has outlets for electric razors, two-tone chiming to summon the porter and a telephone system for wireless communication with their installation being standard practice on all cars of this type shipped.

TOWN & District

Born to Mr. and Mrs. O. F. Ferguson, November 15th, a girl, Beverly May.

L.C. Jack Lester, who is a member of the sappers at the Medicine Hat internment camp spent the week end in town visiting his wife and friends.

The date of the annual Old Timers' dance has been set for Friday evening December 6th. This will be the nineteenth as this famous dance has held the spotlight in social affairs in Gleichen. As at the 20th dance next year some kind of a lead-up should be made commanding the event and presented to those who have never missed an Old Timers' dance in Gleichen.

Mr. and Mrs. E. J. Boileau left last Thursday evening for Tennessee where they will spend the winter visiting relatives and friends. They do not expect to return until April.

watertight cage a fluttering fullness at the waist (Page 21).

Try matching a Cardigan Sweater (Page 22) with a young dress... Dresses—you'll be delighted with the results.

The sweater with respect to barley is similar, but not quite so good. Seventeen different varieties of wheat in samples we tested for germination, but only seven are officially recommended. OAC 21, Muenroy Ottawa 60 and Olli are the best in quality and suited for mailing purposes; while Plush, Wisconsin 38, Samalua, Rex, Prospect, Neway, Royal, and Kew are considered suitable for feed varieties. For the feed varieties, all except Triticale are soundly average. 88.3% of the wheat varieties were found to be recommended.
